Theme issue: Multiscale modelling at the physics–chemistry–biology interface

	Article ID	Article ID
INTRODUCTION		
Bridging the gaps at the physics–chemistry–biology interface PV Coveney, JP Boon and S Succi	20160335	20160140
		Microscopic and continuum descriptions of Janus motor fluid flow fields SY Reigh, M-J Huang, J Schofield and R Kapral
		20160147
		Kinetics and thermodynamics of living copolymerization processes P Gaspard
		20160150
ARTICLES		
Big data need big theory too PV Coveney, ER Dougherty and RR Highfield	20160153	20160150
		Probing the mechanisms for the selectivity and promiscuity of methyl parathion hydrolase M Purg, A Pabis, F Baier, N Tokuriki, C Jackson and SCL Kamerlin
Chimaera simulation of complex states of flowing matter S Succi	20160151	20160225
		Multiscale simulation of molecular processes in cellular environments M Chiricotto, F Sterpone, P Derreumaux and S Melchionna
Thermodynamics of adaptive molecular resolution R Delgado-Buscalioni	20160152	20160145
		Towards the virtual artery: a multiscale model for vascular physiology at the physics–chemistry–biology interface AG Hoekstra, S Alowayyed, E Lorenz, N Melnikova, L Mountrakis, B van Rooij, A Svitenkov, G Závodszy and P Zun
Evaluating dispersion forces for optimization of van der Waals complexes using a non-empirical functional AA Arabi	20160145	20160146
		A perspective on bridging scales and design of models using low-dimensional manifolds and data-driven model inference J Tegnér, H Zenil, NA Kiani, G Ball and D Gomez-Cabrero
Lattice Boltzmann accelerated direct simulation Monte Carlo for dilute gas flow simulations G Di Staso, HJH Clercx, S Succi and F Toschi	20160226	20160148
		Reaction–diffusion basis of retroviral infectivity SK Sadiq
Invariance principle and model reduction for the Fokker–Planck equation IV Karlin	20160142	20160141
		Improved insights into protein thermal stability: from the molecular to the structurome scale F Pucci and M Rooman
Generation of mechanical force by grafted polyelectrolytes in an electric field: application to polyelectrolyte-based nano-devices NV Brilliantov, YuA Budkov and C Seidel	20160143	20160138
Kinetics of intercalation of fluorescent probes in magnesium–aluminium layered double hydroxide within a multiscale reaction–diffusion framework D Saliba and M Al-Ghoul	20160138
