Contents

Theme issue: Experimental testing and modelling of brittle materials at high strain rates

INTRODUCTION
Brittle materials at high-loading rates: an open area of research
P Forquin

ARTICLES
An improved computational constitutive model for glass
TJ Holmquist, GR Johnson and CA Gerlach

Strain rate sensitivity of the tensile strength of two silicon carbides: experimental evidence and micromechanical modelling
J-L Zinszner, B Erzar and P Forquin

A pulse-shaping technique to investigate the behaviour of brittle materials subjected to plate-impact tests
P Forquin and J-L Zinszner

Hypervelocity impacts into porous graphite: experiments and simulations
D Hébert, G Seisson, J-L Rullier, I Bertron, L Hallo, J-M Chevalier, C Thessieux, F Guillot, M Boustie and L Berthe

Application of microtomography and image analysis to the quantification of fragmentation in ceramics after impact loading
P Forquin and E Ando

In situ observation of fracture processes in high-strength concretes and limestone using high-speed X-ray phase-contrast imaging
ND Parab, Z Guo, M Hudspeth, B Claus, BH Lim, T Sun, X Xiao, K Fezzaa and WW Chen

Use of simulated experiments for material characterization of brittle materials subjected to high strain rate dynamic tension
B Lukić, D Saletti and P Forquin

Measurement of fracture properties of concrete at high strain rates
V Rey-De-Pedraza, DA Cendón, V Sánchez-Gálvez and F Gálvez

High-performance concrete engineered for protective barriers
AN Dancygier

Ultra-high performance fibre-reinforced concrete under impact: experimental analysis of the mechanical response in extreme conditions and modelling using the Pontiroli, Rouquand and Mazars model
B Erzar, C Pontiroli and E Buzaud

Simplified strategies based on damage mechanics for concrete under dynamic loading
J Mazars and S Grange

Effects of strain rate and surface cracks on the mechanical behaviour of Balmoral Red granite
A Mardoukhi, Y Mardoukhi, M Hokka and V-T Kuokkala

Hugoniot equation of state of rock materials under shock compression
QB Zhang, CH Braithwaite and J Zhao

Experimental and numerical study of drill bit drop tests on Kuru granite
M Fourmeau, A Kane and M Hokka
