Contents

Theme issue: New horizons for nanophotonics

PREFACE

New horizons for nanophotonics
YS Kvshar, WL Barnes, O Hess and N Zheludev

ARTICLES

Multipolar interference effects in nanophotonics
WL Liu and YS Kvshar

Strong coupling in hybrid metal–dielectric nanoresonators
M Decker, T Pertsch and I Staude

Third-harmonic generation from Mie-type resonances of isolated all-dielectric nanoparticles
EV Melik-Gaykazyan, MR Shcherbakov, AS Shorokhov, I Staude, I Brener, DN Neshev, YS Kvshar and AA Fedyanin

Suppression of scattering for small dielectric particles: anapole mode and invisibility
B Luk’yanchuk, R Paniagua-Domínguez, AI Kuznetsov, AE Miroshnichenko and YS Kvshar

Refractive index sensing with Fano resonances in silicon oligomers
KE Chong, HW Orton, I Staude, M Decker, AE Miroshnichenko, I Brener, YS Kvshar and DN Neshev

Metasurface polarization splitter
BA Slovick, Y Zhou, ZG Yu, II Kravchenko, DP Briggs, P Moitra, S Krishnamurthy and J Valentine

Electrical tuning of the polarization state of light using graphene-integrated anisotropic metasurfaces
S Dutta-Gupta, N Dabidian, I Kholmanov, MA Belkin and G Shvets

Intensity dependences of the nonlinear optical excitation of plasmons in graphene
TJ Constant, SM Hornett, DE Chang and E Hendry

Double-resonant enhancement of third-harmonic generation in graphene nanostructures
JW You, J You, M Weismann and NC Panoiu

Replacing noble metals with alternative materials in plasmonics and metamaterials: how good an idea?
JB Khurgin

Chiral optical fields: a unified formulation of helicity scattered from particles and dichroism enhancement
M Nieto-Vesperinas

Magnetic field concentration assisted by epsilon-near-zero media
IL Liberal, Y Li and N Engheta

Phase-resolved pulse propagation through metallic photonic crystal slabs: plasmonic slow light
A Schönhardt, D Nau, C Bauer, A Christ, H Gräbeldinger and H Giessen

Coupled dipole approximation across the Γ’-point in a finite-sized nanoparticle array
J-P Martikainen, AJ Moilanen and P Törmä
