Discussion meeting issue: Cometary science after Rosetta

INTRODUCTION
Cometary science after Rosetta

GH Jones, MM Knight, A Fitzsimmons and MGGT Taylor

ARTICLES
Setting the scene: what did we know before Rosetta?
KJMeech

The Rosetta mission orbiter science overview: the comet phase
MGGTaylor, N Altobelli, BJ Buratti and M Choukroun

The Philae lander mission and science overview
HBoehnhardt, J-PBibring, I Apathy, HUAuster, AEFinzi, F Goessmann, K Klingelhöfer, M Knapmeyer, W Kofman, H Krüger, S Mottola, W Schmidt, K Seidensticker, T Spohn and I Wright

The composition of cometary ices
D Bockelée-Morvan and NBiver

D2O and HDS in the coma of 67P/Churyumov–Gerasimenko
K Altwegg, H Balsiger, JJ Berthelier, A Bieler, UCalmonte, JDKeyser, BFiethe, SA Fuselier, SGasc, TIGombosi, T Owen, L Le Roy, M Rubin, T Sémont and C-YTzou

Mechanical and electrostatic experiments with dust particles collected in the inner coma of comet 67P by COSIMA onboard Rosetta
MHilchenbach, HFischer, YFuselier, SBagnulo, J BFiethe, SBValsecchi, SEFoglia, AVafanasiev, EKochenova, JM Pajuelo, FPajuelo, A Kastner, K Chatterjee, M Baltay, D Espinosa Lara, ASkornický, M Bachtler, L Krassilov, F Schödel, A Riffeser, PRousselot, ELRyan, BRajkumar, YRamanjooloo, ERamos, CRies, ARiffeser, PRosenbush, PRousselot, ELRyan, BZaprudina and TJZegmott

Interaction of the solar wind with comets: a Rosetta perspective
K-HGlassmeier

The 67P/Churyumov–Gerasimenko observation campaign in support of the Rosetta mission
CPinroot, MJPajuelo, A Santolaya, MGillon, KFukuzawa, AMicheli, SMSchäfer, JKalas, KRivkin, SGaspar, JBFusetto, M mip, TKrieger, YHidalgo, JCaselli, MGray, C Matranga, CCorsaro, ROHansen, KJLee, MAlibert, SInamog, J van der Linden, T Theiler, TM ar, T Destombes, DRégard, A Mann, J-CPinot, AMicheli, JVRombouts, C Barnet, BZaprudina, LCapaccini, GKerschbaum, FM de Pater, JSchrijver, AThompson, GPTozzi, CTubiana, GLVillanueva, XWang, DHWoo, MYagi, BVan Eylen, LLeRoy, BZaprudina and TPursimo

Comets as a possible source of nanodust in the Solar System cloud and in planetary debris discs
IMann
Cometary dust: the diversity of primitive refractory grains
DH Wooden, HA Ishii and ME Zolensky
20160260

SOHO comets: 20 years and 3000 objects later
K Battams and MM Knight
20160257

Asteroid–comet continuum objects in the solar system
HH Hsieh
20160259

Comets: looking ahead
MF A’Hearn
20160261
