Contents

Discussion meeting issue: The challenges of hydrogen and metals

INTRODUCTION

The challenges of hydrogen and metals
AT Paxton, AP Sutton and MW Finnis

ARTICLES

Clean energy and the hydrogen economy
NP Brandon and Z Kurban

Alloy and composition dependence of hydrogen embrittlement susceptibility in high-strength steel fasteners
SV Brahimi, S Yue and KR Sriraman

Political, economic and environmental concerns: discussion
GCC Skinner and FF Dear

Hydrogen behaviour at twist {110} grain boundaries in \(\alpha\)-Fe
EJ McEniry, T Hickel and J Neugebauer

A kinetic Monte Carlo approach to diffusion-controlled thermal desorption spectroscopy
T Schablitzki, J Rogal and R Drautz

Lattice discontinuities affecting the generation and annihilation of diffusible hydrogen and vice versa
R Kirchheim

Isotopic tracing of hydrogen transport and trapping in nuclear materials
J Chêne and F Martin

Hydrogen transport and trapping: from quantum effects to alloy design: discussion
Y-S Chen and H Lambert

Hydrogen-related challenges for the steelmaker: the search for proper testing
RG Thiessen

Analysis of electro-permeation of hydrogen in metallic alloys
A Raina, VS Deshpande and NA Fleck

Hydrogen enhanced cracking studies on Fe–3wt%Si single and bi-crystal microcantilevers
T Hajilou, Y Deng, N Kheradmand and A Barnoush

Hydrogen–enhanced cracking revealed by in situ micro-cantilever bending test inside environmental scanning electron microscope
Y Deng, T Hajilou and A Barnoush

A review of cohesive zone modelling as an approach for numerically assessing hydrogen embrittlement of steel structures
L Jemblie, V Olden and OM Akselsen

Hydrogen-enhanced fatigue crack growth in steels and its frequency dependence
H Matsunaga, O Takakuwa, J Yamabe and S Matsuoka

Hydrogen in steels: discussion
EL Simpson and M Patel
