Contents

Theme issue: Energy management: flexibility, risk and optimization

INTRODUCTION
Energy management: flexibility, risk and optimization
J Moriarty and P Mancarella

ARTICLES
Planning low-carbon electricity systems under uncertainty considering operational flexibility and smart grid technologies
R Moreno, A Street, JM Arroyo and P Mancarella

Robust estimation of risks from small samples
SH Tindemans and G Strbac

Detecting changes in real-time data: a user’s guide to optimal detection
P Johnson, J Moriarty and G Peskir

Real option valuation of a decremental regulation service provided by electricity storage
DZ Szabó and R Martyr

Partial differential equation methods for stochastic dynamic optimization: an application to wind power generation with energy storage
P Johnson, S Howell and P Duck

A methodology to assess the economic impact of power storage technologies
L El-Ghandour and TC Johnson

Procuring load curtailment from local customers under uncertainty
A Mijatović, J Moriarty and J Vogrinc

Games and teams with shared constraints
AA Kulkarni

Probabilistic stability analysis: the way forward for stability analysis of sustainable power systems
JV Milanović

Wide-area measurement system-based supervision of protection schemes with minimum number of phasor measurement units
S Gajare, JG Rao, OD Naidu and AK Pradhan

Coordinated single-phase control scheme for voltage unbalance reduction in low voltage network
D Pullaguram, S Mishra and N Senroy

An input-to-state stability approach to verify almost global stability of a synchronous-machine-infinite-bus system
J Schiffer, D Efimov, R Ortega and N Barabanov
