Contents

Discussion meeting issue: Ocean ventilation and deoxygenation in a warming world

INTRODUCTION
Ocean ventilation and deoxygenation in a warming world: introduction and overview
JG Shepherd, PG Brewer, AO Schlies and AJ Watson

ARTICLES
Ventilation variability of Labrador Sea Water and its impact on oxygen and anthropogenic carbon: a review
MR Rhein, R Steinfeldt, DK Kieke, IS Stendardo and I Yashayaev

Physiological and ecological implications of ocean deoxygenation for vision in marine organisms
LR McCormick and LA Levin

Ocean (de)oxygenation from the Last Glacial Maximum to the twenty-first century: insights from Earth System models
LBopp, L Resplandy, A Untersee, P Le Mezo and MKageyama

High-latitude ocean ventilation and its role in Earth’s climate transitions
AC Naveira Garabato, GANeMacGilchrist, PJ Brown, DGEvans, AJS Meijers and JDZika

Patterns of deoxygenation: sensitivity to natural and anthropogenic drivers
AOschlies, ODuteil, JGetzlaff, WKoeve, ALandolfi and SSchmidtko

Depth perception: the need to report ocean biogeochemical rates as functions of temperature, not depth
PG Brewer and ET Peltzer

Ocean deoxygenation, the global phosphorus cycle and the possibility of human-caused large-scale ocean anoxia
AJ Watson, TM Lenton and BJW Mills

Climate change and ocean deoxygenation within intensified surface-driven upwelling circulations
ABakun

Biogeochemical modelling of dissolved oxygen in a changing ocean
OAndrews, EBuitenhuis, CLe Quéré and P Suntharalingam

Photosynthetic oxygen production in a warmer ocean: the Sargasso Sea as a case study
KRichardson and JBendtsen

ADDENDUM
Ocean ventilation and deoxygenation in a warming world: posters
JG Shepherd, PG Brewer, AO Schlies and AJ Watson
