

Cover image

An iFACTS air traffic control workstation. Analysis and verification techniques have matured enough to be successfully applied to real-world software systems, ranging from fully verified air traffic control software to lightweight bug finding in the code of major companies, such as Facebook, Google, and Amazon. Copyright NATS 2016. Reused under the Creative Commons Licence from the NATS Media Toolkit.

Typeset by Nova Techset Private Limited, Bengaluru & Chennai, India. Printed in the UK by Cambrian Printers.
