Theme issue: From atomistic interfaces to dendritic patterns

	Article ID		Article ID
INTRODUCTION			
From atomistic interfaces to dendritic patterns PK Galenko and DV Alexandrov	20170210	A model for free growth of a lamellar eutectic dendrite with an incident flow J Gao	20170209
SECTION 1: MICROSCOPIC ANALYSIS			
A phase-field-crystal alloy model for late-stage solidification studies involving the interaction of solid, liquid and gas phases N Wang, G Kocher and N Provatas	20170212	Thermo-solutal and kinetic modes of stable dendritic growth with different symmetries of crystalline anisotropy in the presence of convection DV Alexandrov, PK Galenko and LV Toropova	20170215
Travelling-wave amplitudes as solutions of the phase-field crystal equation IG Nizovtseva and PK Galenko	20170202	Kinetic transition in the order–disorder transformation at a solid/liquid interface PK Galenko, IG Nizovtseva, K Reuther and M Rettenmayr	20170207
Coarse-graining for fast dynamics of order parameters in the phase-field model D Jou and PK Galenko	20170203	Dendrite fragmentation: an experiment-driven simulation T Cool and PW Voorhees	20170213
Two-component structural phase-field crystal models for graphene symmetries KLM Elder, M Seymour, M Lee, M Hilke and N Provatas	20170211	SECTION 3: MACROSCOPIC MODELLING	
Domain shape instabilities and dendrite domain growth in uniaxial ferroelectrics VYa Shur and AR Akhmatkhanov	20170204	A complete analytical solution of the Fokker–Planck and balance equations for nucleation and growth of crystals EV Makoveeva and DV Alexandrov	20170327
SECTION 2: MESOSCOPIC DESCRIPTION			
Crystal growth kinetics in undercooled melts of pure Ge, Si and Ge–Si alloys DM Herlach, D Simons and P-Y Pichon	20170205	Analytical solutions of mushy layer equations describing directional solidification in the presence of nucleation DV Alexandrov, AA Ivanov and IV Alexandrova	20170217
Thermoelectric magnetohydrodynamic effects on the crystal growth rate of undercooled Ni dendrites A Kao, J Gao and K Pericleous	20170206	Nonlinear dynamics of mushy layers induced by external stochastic fluctuations DV Alexandrov, IA Bashkirtseva and LB Ryashko	20170216
		The boundary integral theory for slow and rapid curved solid/liquid interfaces propagating into binary systems PK Galenko, DV Alexandrov and EA Titova	20170218
