Discussion meeting issue: Earth dynamics and the development of plate tectonics

	Article ID		Article ID
INTRODUCTION			
Earth dynamics and the development of plate tectonics CJ Hawkesworth and M Brown	20180228	Laboratory investigation of mechanisms for phase mixing in olivine + ferropericase aggregates HS Wiesman, ME Zimmerman and DL Kohlstedt	20170417
		The dependence of planetary tectonics on mantle thermal state: applications to early Earth evolution BJ Foley	20170409
ARTICLES			
Magma oceans as a critical stage in the tectonic development of rocky planets L Schaefer and LT Elkins-Tanton	20180109	The inception of plate tectonics: a record of failure C O'Neill, S Turner and T Rushmer	20170414
Global tectonic evolution of Venus, from exogenic to endogenic over time, and implications for early Earth processes VL Hansen	20170412	When crust comes of age: on the chemical evolution of Archaean, felsic continental crust by crustal drip tectonics O Nebel, FA Capitanio, J-F Moyen, RF Weinberg, F Clos, YJ Nebel-Jacobsen and PA Cawood	20180103
The diversity of tectonic modes and thoughts about transitions between them A Lenardic	20170416	Rates of generation and destruction of the continental crust: implications for continental growth B Dhuime, CJ Hawkesworth, H Delavault and PA Cawood	20170403
Early earth geodynamics: cross examining the geological testimony AIS Kemp	20180169	Crustal evolution and mantle dynamics through Earth history J Korenaga	20170408
Geological archive of the onset of plate tectonics PA Cawood, CJ Hawkesworth, SA Pisarevsky, B Dhuime, FA Capitanio and O Nebel	20170405	Biogeodynamics: bridging the gap between surface and deep Earth processes AL Zerkle	20170401
The evolution of plate tectonics RJ Stern	20170406
